17 February 1956

MEMORANDUM FOR: [REDACTED]

SUBJECT : Passports on Project Personnel

1. With reference to our telephone conversation of yesterday, I am putting a few facts in writing for your information and much appreciated action.

2. We understand from information received from these individuals that the passports of [REDACTED] and [REDACTED] are being held at Headquarters, USAF. As discussed with you, it is unusual for the USAF to retain such passports; but as these individuals have indicated that such is the case, I would appreciate your checking. If you find that these individuals' passports are not being held by USAF, could you check with the Department of State and see if they have been returned to that Department?

3. It has been further reported to us that the passport of [REDACTED] is on file at Headquarters, USMC. Again, I doubt this; but perhaps through your Pentagon connections you could check on this and, if the USMC does not have it, check with the Department of State.

4. I would like to notify the above individuals as soon as you have some information. However, the matter is not urgent in that we need to know within the next couple of days. I would appreciate information before the end of next week (24 February).

5. It is my understanding that CFB has a passport on [REDACTED]. Would you kindly check to see if you have these on file and, if so, I would appreciate your sending them to me for my retention along with the others already received by me.

6. To sum up, those applications which have been processed through you to date and the passports which I would expect to receive from you include the following individuals: [REDACTED]

7. [redacted] has made his application for a passport through Chicago this date and has given the address to which the passport should be mailed as, "Military District, Washington - Mill Call - NW - 129". He notified me by telephone from Chicago that this was done today. Attached you will find three (3) copies of orders on which his name appears; one for your retention, one to be sent out by you for back-stopping and one extra copy.
